

# Advantageous

## Fix the reporting, process and workflow bottlenecks slowing your business down.

### Core Capabilities

#### Dashboards & Reporting

More than just a shiny new tool - we build automated reports that highlight risks and opportunities.

#### AI Systems

Far beyond ChatGPT. We embed governed AI solutions in your processes, keeping humans in the loop.

#### Process Optimisation

Not everything requires AI. Our benefit driven process optimisation practice buys back time and reduces risk.

#### Project Portfolio Services

Our P3M™ certified specialists skilled in data analytics support the system development for project based organisations.

#### Business Cases

Investment-grade business cases that integrate strategic alignment, modelling, risk analysis and delivery pathways.

#### Master Strategy Development

We link strategy, reporting, automation and execution so improvements work in the real business, not just on paper.

### What differentiates us?

#### Senior delivery only

You deal directly with senior practitioners, not junior analysts learning on your time.

#### Save time, reduce cost, de-risk

We only build solutions that save you time, reduce costs or materially lowers risk.

#### Built for real operations

We work within your systems, constraints and operating environment.
